## Investment Objective

The fund seeks to achieve growth of your investment by investing mainly in shares (equity) and similar securities issued by high quality companies listed on the stock exchanges of European countries within the Organisation for Economic Co-operation and Development (OECD).

## Commentary

Rightmove was the best performer, up +11.1% for the month after an acquisition offer by REA Group, an Australian digital advertising business specialising in property and best known as the owner of the Australia's leading real estate portal. Straumann was second best, rising +10.20% after releasing better than expected second quarter results in August and announcing the sale of Dr Smile, its direct-to-consumer clear-aligner business. Novo Nordisk was the worst performer down -16.13%. The stock reacted negatively to the prospect of increasing competition in the obesity space and the potential for greater than anticipated pricing pressure as a result. Edenred was second worst, down -10.97%. The stock was weighed down by several macro headwinds: a French fiscal budget crisis, a slowdown in the French economy and consequent uncertainty regarding new meal vouchers regulation.

**Past performance does not predict future returns. Investments in the Fund are subject to certain risks and the value of an investment can go down as well as up and investors may not get back their original amount invested. The performance calculation is based on CHF. If the currency in which the past performance is displayed, and/or the currency in which fees and charges are paid by the Fund, differs from the currency of the country in which you reside, then you should be aware that due to exchange rate fluctuations the performance shown may increase or decrease if converted into your local currency. The Fund is actively managed, which means that the investments are selected at the discretion of the investment manager.**

## Principal Risk Factors

The Fund is subject to a range of risks including:

**Market Risk:** The Fund is subject to normal market fluctuations and the risks associated with investing in international securities markets.

**Investment Risk:** The value of investments can fall as well as rise and investors might not get back the sum originally invested.

**Political Risk:** The Fund invests in markets where economic and regulatory risks can be significant.

**No Capital Guarantee:** Positive Returns are not guaranteed and no form of capital protection applies.

**Currency Risk:** The Fund may acquire assets in currencies other than the base currency of the Fund and as a result the value of the Fund's investments may rise and fall due to changes in foreign exchange rates.

**Hedging Risk:** In respect of hedged (H) share classes, the value of the Fund's investment in derivatives depends primarily on the performance of the underlying asset. A small movement in the value of the underlying asset may cause a large movement in the value of the derivative. There is no guarantee that the Fund's use of hedging to protect against changes in currency exchange rates will be successful.

More information in relation to risks in general may be found in the "Risk Factors" section of the prospectus.

## Important Information
